3. Check **"Get email notifications for new responses"**.

This ensures every inquiry submitted is sent directly to **info@integraadvisorypartners.com**.

PART 2: How to Connect Forms to the CMS & Website

A. Direct Link Forms (Forms 3 & 4)

- **Document Upload:** Copy the shareable link (`.../viewform`) ➔ Go to CMS **Settings ➔ Section 06: Document upload ➔** Paste into **Upload link**.
- **Events Registration:** Copy the shareable link (`.../viewform`) ➔ Go to CMS **Settings ➔ Google Forms ➔** Paste into **Register Interest form · Events page**.

B. Website Embedded Forms (Forms 1 & 2: Contact & Intake)

These forms submit seamlessly from the website UI and require the **Form Response Link** (ending with `/formResponse`) and individual question **Entry IDs** (e.g. `entry.123456789`).

- **Option 1 (Automated Project Script):** Run in terminal:

  ```
  node frontend/scripts/google-form-ids.mjs "<Your Google Form URL>"
  ```

  The script immediately outputs the `/formResponse` URL and all entry IDs to paste into CMS Settings.
- **Option 2:** Share the view/edit links with the dev team to auto-extract and configure them directly into CMS Settings.

C. Verification

Click **Save Changes** in CMS Settings. Submit a test message on `/contact` and verify that the response arrives in your Google Form responses spreadsheet and your email at **info@integraadvisorypartners.com**.
